Auditor Verification: Lead Officer (Utkarshaa)
Evaluation Date: 2026-06-12

Compliance Index Score

This score is calculated based on adherence to control questions from ISO 42001, EU AI Act risk metrics, and NIST Framework configurations.

83%

Compliance Findings & Action Gaps

IDENTIFIED REGULATORY & PROCESS GAPS

[ISO-A.3] - Is there a continuous AI System Impact Assessment mapping to societal values and fundamental human rights? **MEDIUM RISK / GAP**

Client Answer Status: Ad-hoc assessments performed occasionally

Client Justification: "Working on automating socio-economic impact triggers in Q3."

Auditor Remediation Directive: No specific correction instructions entered.

[EU-H.2] - For systems classified as high-risk, is there a robust Human-in-the-Loop (HITL) override system implemented? **MEDIUM RISK / GAP**

Client Answer Status: Human review is manual and delayed

Client Justification: "We have manual approval overrides, but need a direct API shutdown switch."

Auditor Remediation Directive: No specific correction instructions entered.

[NST-M.2] - Are model drift, accuracy decay, and security vulnerabilities monitored continuously in production? **MEDIUM RISK / GAP**

Client Answer Status: Periodic manual evaluation performed

Client Justification: "Monitoring accuracy but need automated alert configurations."

Auditor Remediation Directive: No specific correction instructions entered.
